## **Project 2: Mera Bhujal**

**Parent Company :** Global Edge Technologies

**Child company :** Dodoteks Software pvt Ltd

**current status:** Closed

**Duration:** September 2017 to August 2018

### **Description:**

This project involves building a native Android Mobile application. Mera Bhujal is a place where we can find the details of the underground water like Quantity and Quality. Users can know everything about the underground water like:

- Provides ground water resources information for users current/desired location
- Information on annual ground water availability and withdrawal and stage of groundwater withdrawal
- Indicates the withdrawal stages in color coded format, suitable suggestions to augment the ground water
- Provide ground water quality information of user locality and suitable suggestions for sustainable utilization of groundwater.
- Provide contact information of various other agencies working for groundwater augmentation and conservation

**Tech stack:** Android Studio, Java, SQLite database

Play Store URL: <https://play.google.com/store/apps/details?id=com.geoclimaterisk.gwinfo4>

**Role and responsibilities:**

- Implementation of UI screens as per wireframes.
- Daily Scrums, Planning, Weekly Status Reports. Team Management.

**Project 3: Gully Deals**

**own project**

**Duration: January 2018 to 2019**

**Description:**

Gully Deals is a normal app which is done by our own interest. It is an Android Based app. which user can login through Facebook, Gmail and Phone Number. It is basically a app which fills the gap between the local vendors and the customers. That the app provides the platform for local vendors to sell their products with the offer's users can buy them. We use firebase for this project for all authentication and data storage.

**Tech stack:** Java, Android Studio, Firebase, SQLite, Gmail and Facebook APIs, Bitbucket, native app development

**Role and responsibilities:**

- Involved in gathering and understanding customer requirements.
- Implementation of UI screens and functionality.
- Implementation of Social media and events data
- Developing custom UI components
