Other Skills

Intermediate knowledge in AWS instances, deployment and managing servers. Handy with Git.

Experience

Software Engineer II, HomeLane

December 2017 - Till Date

I'm working on multiple projects in HomeLane as a full stack developer as well as being involved in business discussions and architectural design discussions.

- Roster - An internal tool which is built for managing customer journey in HomeLane and respective stakeholders to see what all action they need to take. I took overall ownership of the tool and worked on multiple modules like payment management dashboard of finance, payout calculation module for Design Partners and Square Partners, frontend pages and the API integrations, database design and architecture decisions, optimization of queries etc. **[Frontend: React, PHP. Backend: PHP, MySQL]**
- SiteWise App - Internal app for Project Managers to approve/reject customer's scope of work. I created the basic architecture, auth module, and 95% of the pages and the functionalities of the App. I'm also handling the deployment and updations of the App. The iOS version was also developed but was not deployed because of the Apple business model policy. **[Frontend: Ionic. Backend: PHP MySQL]**
- HomeLane Website - I worked on modules like quick estimator and order tracking. I was also involved in the migration of website from PHP to React. **[Frontend: React, PHP. Backend: PHP, MySQL]**
- Blitz Website - A website which is exclusive only for a selected set of customers depending on their location. I managed a team of 3 members. I planned the architecture and DB design of the entire project, created the basic structure of the project from scratch, decided the stack, created pages in React etc. **[Frontend: Next Js. Backend: PHP, MySQL, Node Js]**
- Past Project Site - A website for internal users to show customers the images of previous projects completed by HomeLane. I architected and developed the frontend and backend all by myself. **[Frontend: Angular. Backend: Node]**

I was working on the Roster and Capricoast website.

- Estimator Page - Customer will be able to generate a rough estimate price for his project. I developed the entire backend for the estimator. **[PHP, MySQL]**
- Payment Gateway Integration - Integrated different payment gateways for enabling customers to make payments.
- Customer Order Module - Module for tracking customer order timelines and payments. I developed the entire backend for the module.**[PHP, MySQL]**
- CRM Migration - I wrote automation scripts for data migration from Zoho CRM to Salesforce, data validation between DB, Salesforce and Zoho.**[PHP, Javascript]**
- Webhooks - Exposed webhooks for Salesforce and Acuity. **[PHP, MySQL]**

PHP Developer, TechWyse IT Solutions

July 2016 - January 2017

I was working as a wordpress support personnel in TechWyse IT solutions. I have developed plugins for wordpress according to the client's requirements.

Personal Projects

1. **GODD#TODO**: A basic todo application which is under development to explore **React Native**.
2. **GODD#FIN**: A finance tracking app which is under development using **Flutter** where users can keep track of their finances.
3. **TodayWas**: An app built in **Ionic** for recording personal notes/diary.
4. **Heart Music Player**: A simple music player app built using **Electron JS** for multi platform desktop OS.

Education

Diploma in Computer Engineering

KKMMPTC College Mala, Kallettumkara

2012 - 2015

CGPA - 7
