|---------------------|------------|------------|
| SSC | RBSE | 69.17 |
| HSC (Maths Science) | RBSE | 73.69 |
| B.Tech (ECE) | RTU, Kota | 67.22 |

PROJECTS UNDERTAKING

1) **Snap420** : Its a chat app. In this project. I integrated XMPP server using Smack Library . Custom Camera was added in this app

2) **SongShooter** : It's a music and Audio app. If you want the song for free, you have to be there each day to get it. The song is only free on the day

it's featured! After that, it's gone and you have to go buy it somewhere.

- 3) ***Nusatrip*** : Its a Hotel and Flight Booking App. Time-saving and easy to use Booking Search Engine: Combining advanced technology with up-to-date travel expertise, NusaTrip apps allows travelers to search and book thousands of airline fares and only offer the best deals.
 - 4) ***Genious School management(ERP)*** : It is product of School. There are module in it like teacher, principal, parents, Students and HR etc.
 - 5) ***Animal Husbandry(ERP)*** : It is product of company. Animal are only cow and bull. Product having Farmer module. We can create more than one animal animal under one farmer. Each animal perform Event in every lactation.
 - 6) ***PashuSahayak*** : It is product. We can create only animal and perform event. I used Kotlin Language for developing this app
-
