## OBJECTIVE

---

Seeking a challenging position as an iOS technology lead / architect through which my iOS expertise will be well utilized and developed.

## WORK EXPERIENCE

---

Accenture

Nov 02, 2016 — Present

*Technology Lead*

- Technology Lead at Accenture with more than 8 years of experience in iOS Development.
- Leading the development team of more than 10 Sr. iOS developers from onshore.
- Responsible for end to end delivery of the application.
- Developed robust architecture, network layer, reusable components in various projects.
- Assured the development is of excellent quality with detailed code review and SwiftLint integration.
- Involved in client interactions, requirement gathering, estimates and feasibility analysis.
- Worked as a sole developer for multiple applications which were built from scratch.

Infosys Limited

July 23, 2012 — Oct 28, 2016

*Senior Systems Engineer*

- Sr. iOS Developer at Infosys.
- Involved in writing functional design documents, functional specification and technical specification documents.
- Involved in designing User Interface for various modules using code and storyboards.
- Responsible for code maintenance in SVN i.e. tagging, branching of code.
- Worked on various POCs apart from the project for continuous learning and development.
- Published several knowledge artifacts which can be used in other projects and POCs.

## AWARDS AND RECOGNITION

---

- Accenture ACE (Accenture Celebrates Excellence) Team Award (Q1-2020) in Client and Customer category for successful delivery and launch of the mobile application.
- Accenture Apex Trendsetter 2017 award for "Introducing innovative processes and enhancing the existing processes, while maintaining high quality standards".
- Monetary Reward - Developed a Machine Learning POC on iOS which got shortlisted in Global Technology Innovation Contest, 2018.
- Monetary Reward - "P4 - Expert" Proficiency in iOS Application Development as per Accenture Internal assessments.
- Completed Agile Professional Certification - An Accenture Internal Certification on Agile.

# PROJECTS

---

**Project :** MySTC

**Domain :** Telecom.

**Project Description :**

MySTC App gives users the ability to control and deal with their own mobile and landline numbers by providing them a lot of services and features that helps doing operations easily, like viewing and paying the bills, recharge prepaid numbers and transfer amounts between them, subscribe and unsubscribe in packages and services, monitor your data usage, view donation points and redeem them with gifts, locate branches and wifi spots in the country, and a lot more features that saves time and effort.

**Role :** As an onshore lead for MySTC v3 and v4, led a team of more than 10 Sr. iOS developers and was responsible for end to end delivery of the application. Designed a robust architecture in MVVM, developed network layer using Generics, used SwiftLint to make sure Swift coding guidelines is strictly followed by the development team, detailed code review for all modules to make sure the delivery is of excellent quality.

**Project :** Microcell

**Domain :** Telecom.

**Project Description :**

The MicroCell iPhone app is used for managing MicroCells under consumer and business accounts. MicroCells are like mini-cell towers for the home or office where radio signals are transmitted to and received by mobile phones and the voice signals are carried over a high speed network.

**Role :** As a lead developer of v2.0, was involved in architecture/solution design of new features, designing the screens, integrating the new modules with backend APIs, code review of junior resources and publishing the application to the App Store.

**Project :** AOTS ticketing system

**Domain :** Telecom.

**Project Description :**

The AOTS for IDC app was developed for Internet Data Center (IDC) technicians. A mobile interface with wireless connectivity to allow the IDC technicians to be more productive, acknowledge tickets, provide ticket status, check customer email requests, log into AOTS for data needed to perform work.

**Role :** As a lead developer, was involved in requirement gathering, estimates, architecture/solution design, designing all the screens, integrating all the modules with backend APIs and publishing the application to the Enterprise Store.

**Project :** Deployment Dashboard iPad application.

**Domain :** Telecom.

**Project Description :**

Deployment Dashboard handles the deployment process efficiently and effectively helping user to get all the deployment details and associated data. Deployment dashboard enhances the user experience during the deployment process.

**Role :** As a lead developer, involved in architecture design, development of key modules such as View Deployments (Graphs view), View Deployments (Calendar view), Manage Users etc. and was also involved in code reviews of junior team members.

**Project :** An e-commerce application for the fastest growing retail chain in India.

**Domain :** Retail.

**Project Description :**

It's an e-commerce application for one of the fastest growing retail chain in India. The retail store offers wide range of products under Household, Grocery and Apparel category. The project was to make an iOS and an Android application for its users.

**Role :** As Onsite mobility lead, worked closely with the Product owners to understand the requirements, involved in feasibility analysis on requirements, effort estimations based on the complexity of the requirements, worked with the design team to finalise the design of the app, writing Epics and user stories and getting it signed off by the client, developing the modules, code review of team members and delivering the application to the end users.

**Project :** AmexNow - An experimental application for employees of a US based financial company.

**Domain :** Banking.

**Project Description :**

AmexNow is a banking application with features such as discover partner merchants/stores in a clustered map, track reward points, report concern on non-acceptance of the card by any merchant.

**Role :** As a sole iOS developer, designed and developed the entire application from scratch and pushed to production.

**Project :** PRIME R2

**Domain :** Retail.

**Project Description :**

Additional requirements added to PRIME - View promotions on products, check for availability of products and place orders for customers using their iPad.

**Role :** As a mobile analyst, worked on feasibility analysis on requirements, effort estimation based on the complexity of the requirements, designing User Interfaces, writing functional design documents, technical and functional specification documents and developing various modules.
