Professional Experience

IVTL Infoview Technologies Pvt Ltd.,

September 2017 – Present

HUE- AC- CASH PLANNING

Client - Works Application, Japan

Cash planning application is a web application that mainly focuses on the users' cash management system for a particular financial year, updated by the applicant. Users can also upload the file that contains the data of the expenditures done for the financial year, which can be extracted for further needs.

Role: Designing and developing the module

Building an individual module and integrating with other modules within the team. Stabilising the whole application Maintenance after production.

IntraWeb

Client —Works Application, Japan

This is a web based application that is producing Enterprise Resource Planning (ERP) based software for human resource management, financials and e-commerce. By using this application, complicated HR works can be simplified.

Role: UI/UX Enhancement.

Client Side issue Fix Implementation of Additional Features based on requirement

Leave Requesting System - (Infoview Internal Tool)

Client —Infoview, Chennai

This is a software application where an employee can submit the leave application and keep count on his/her leave details for the fiscal year. It is like an approval system design, where one user applies for the leave, the application will be visible for the user with the authority to approve that same application.

Role: Designing and developing UI in the module

Building an individual module and integrating with other modules within the team stabilising the whole application. Maintenance after production

Awards

Team Leading (09/2018 – 12/2018)

Successfully handled one internal tool [Leave Requesting System - (Infoview Internal Tool)] with my juniors and properly completed it without any bugs and got appreciation from my seniors.
