Summary

A coding enthusiast, having a keen interest in building and maintaining products/software. Currently working as a full stack developer in a “Fashion-Tech” startup, developing features and solutions using cutting edge tech. Hands-on experience with almost all aspects of e-commerce solutions, having built scalable and reliable products for the past 1.9 years. Prior to that, co-founded a hardware-startup building a 3D-printer from scratch and with a vision to build a platform to sell products made from recycling plastic waste materials.

Experience

Full Stack Developer

Reduxpress

Dec 2018 - Aug 2020 (1 year 9 months)

Owned multiple e-commerce products (design, develop, deploy and de-risk) like POS, Logistics, Coupon & Discounting, etc.

- Built a bespoke POS for handling in-store purchases: AngularJs based frontend and Node.js based backend, deployed on the cloud.
- Built a bespoke ERP for the backend, processes like Material Management, Vendor Management, Finances, etc: AngularJs based frontend and Node.js based backend.
- Built a Coupon & Discount Management System: AngularJs based frontend and Node.js based backend.
- Wrote multiple microservices in Node.js to make the system more reliable, independent and self-sufficient.
- Worked in a team responsible for rewriting the existing AngularJs based web app in Nuxt.js to enhance performance and deliver better user-experience.

Worked with almost all softwares and systems required for e-commerce business.

Worked in multiple side projects like:

1. A subscription model based grocery delivery app.
2. An app for consulting doctors and getting medicine delivered at home by uploading the prescription during COVID-19.

Co-Founder

Stealth Mode Startup

May 2017 - Nov 2018 (1 year 7 months)

Co-founded a hardware startup involved in recycling and 3D printing plastic waste into useful items.

- Built a 3D printer from scratch using minimal resources.

- Handled the finances and catered the rest of needs required for smooth functioning of the team

Design Internship

Flygrades

Jun 2015 - May 2016 (1 year)

Worked for an edu-tech startup, “Flygrades”, as an intern, designing mockups for their mobile and web apps.

Education

Haldia Institute of Technology 103

Bachelor of Technology - BTech, Industrial Production Technologies/Technicians

2013 - 2017

WBUT

2013 - 2017

Saint Francis School, Deoghar

Skills

Node.js • MongoDB • AngularJS • HTML • Mongoose ODM • Vue.js • Nuxt.js • Express.js
