PROJECTS

IET Inspec Analytics

- IET's Inspec Analytics named 'Best New Product/Service' in The Charleston Advisor's Eighteenth Annual Readers' Choice Awards - November 13, 2019
- Inspec Analytics is based on the IET's Inspec database and was developed to support researchers, strategic managers and libraries in assessing the value and impact of research and make strategic decisions about the direction of their projects, departments and collaborations

Journal Recommendation Service

- The FSTA Journal Recommendation Service (JRS) is an online tool designed for researchers and authors working in the sciences of food and health. The JRS helps users to find relevant journals they can trust; for example, when deciding where to submit their papers, or when assessing if a journal is a suitable information source for their research.

Microbiology Criteria

- Microbiology Criteria provides guidance to all those involved in producing, using and interpreting microbiological criteria in the food and catering industries

American Psychological Association Admin UI

- It is an admin UI for the client where admin can manage mainly three modules like Mail, Conferences, Template by adding editing and deactivating. Also admin can update data by uploading excel file.

Phibase 5.0

- The mission of PHI-base is to provide expertly curated molecular and biological information on genes proven to affect the outcome of pathogen-host interactions. Information is also given on the target sites of some anti-infective chemistries.

Novartis POC

- Novartis was released for POC. Basically it shows relation between terms using graphical visualization

MC-Spider

- It's a tool where we can configure and manage crawling. One of the main feature of this tool is we can preview the xpaths and heading of a particular URL.
