## WORK EXPERIENCE

### Software Development Engineer 2

#### MoveInSync

06/2019 – Present

Bangalore

##### Achievements/Tasks

- Currently working on Auto onboarding service application to on board client.
- Worked on application Rentlz-solution for a year, which provides commute solution to the companies on spot without prior scheduling
- This product is totally configurable depending on customer requirement
- Created every reused component as reusable component in the app. eg dropdowns, popup modals, popup dialog, pagination, map-controls, notification framework, toast and many more.
- worked on optimising the performance and also worked on enhancing security issues.
- Working closely with UI / UX designer to help create then implement best design practices
- Deployment responsibility, Code review of the peers and juniors, interview panellist

### UI Developer

#### Onetrust Privacy Software Management (08/2018 – 05/2019)

08/2018 – 05/2019

OneTrust technology empowers privacy, security and trust. It provides integrated programs that comply with the CCPA, GDPR and many privacy and security laws.

##### Achievements/Tasks

- Worked on application which helps customer to secure their personal data and give them control what to share or not (Consent management)
- It integrates with external system and act as a middle layer system between end user and the external systems for collecting their data and making sure of security.
- create a complex workflow for different systems using the very comfortable UI screens
- contributed in creating reusable components in their own library used across products

### Senior Software Engineer

#### Infosys

12/2015 – 07/2018

##### Achievements/Tasks

- Worked on Apartment management system from scratch. This solution is useful for big societies to handle their whole operations hassle free.
- worked as single contributor to this product as front-end developer.
- Worked on Order and service management dashboard where we can see all the telecom orders
- created pie charts, donut charts and bar charts in the dashboard using ng2-charts for transaction happened in a daily basis, weekly, monthly, quarterly or date based.
