NEHA MH

WORK EXPERIENCE

Toshiba Software India Pvt. Ltd

Software Engineer (Dec 2016 to till date)

▪ **Responsive printer application development** –

Environment : HTML5, Jquery, Javascript, CSS3, Sass, Bootstrap, ES6, React JS, Ajax, JSON, Python, HTTP Request

Role : Designed and developed 20+ printer test applications/UI that supports webAPI's functionalities and that are responsive to printers with different panel inch . These applications perform printer jobs like scan, copy, print with user-specific options using webapi on custom-built designs.

▪ **Interface application** –

Environment : HTML5, CSS3, Jquery, Javascript, Sass, Handlebars, Bootstrap, ES6, Ajax, JSON, Python, HTTP Request

Role : Have developed Interface application that works as both web app & printer panel app for reading all the API's present in swagger document and to execute the API calls using user-specific parameters

▪ **OPM application** –

Environment : React JS, HTML5, CSS3, Jquery, Javascript, Bootstrap, ES6, Ajax, JSON, Python, HTTP Request, SQL database

Role : End-to-end development of the web application where user can search service code details related to printers , make remote connection with those devices located within the specific range and operate remotely with connected printers and execute service code.

Avaya Software India Pvt. Ltd

Intern (July 2015 – October 2016)

- ***Android Application Development*** – *Smart and Safe Education app* in which I was a *front-end developer* and have used *Android Studio IDE*, and have worked on technologies like *Android-XML, Java, Json*
- ***Web Application Development***- *Personal Wifi app* in which I was a *front-end developer* and have worked on technologies like *HTML, CSS, Javascript, Restful API, Http tools*
- Another ***Web application development***- *Healthcare Inventory* in which I was a *UI designer* for showing healthcare details on UI
- ***Web Application Testing*** – Feature oriented testing for web applications.

ACCOMPLISHMENTS

- Qualified in GATE-2014
- Participated at many tech-fair to demo application
- Was part of workshop team where I had to teach how to develop applications for using webAPI during webAPI marketing.
- Got good recognition from different teams for interface app and OPM app, these application was used by all the other teams for executing webAPI and performing printer functionalities.
- Was appreciated and recognized for OPM project idea and implementation.
