rajabasu.2014@gmail.com

WORK EXPERIENCE

Front End Developer

VNR IT SOLUTIONS

12/2019 - Present

Currently, an employee at a not-yet-funded start-up company to develop its product. Includes coding in JavaScript, HTML, CSS, and continued to learn React Js, React Native, and Vue Js.

Achievements/Tasks

- Created TrackMyHealth website from scratch
- Worked with Rest APIs
- Modified and implemented a few web pages in www.mykidsdrawing.in and www.myurbanfarms.in

EDUCATION

B. Tech in Computer Science & Engineering

Assam University

08/2015 - 06/2019

PROJECTS

Diabetes Prediction Using Deep Learning Based On Patients Health Record — *Final year project*

2018 - 2019

Used Deep Learning to detect diabetes disease in a patient using their past health record. The dataset I have used here is downloaded from the Kaggle website and the programming language I used is python.

Design and Implementation of Student Result Management System using Scripting Language(Google App Script, PHP) — *Internship*

2018

In this internship, I have worked on student data management for delivering the individual results to the student email id.
