PROJECTS

Live Covid19 patients tracker.

📅 2020   📍 Pune

The project simply focused on showing the statistics of live corona patients.

- The purpose of project was also to make the people aware of precautions to be taken during this pandemic.

Secure storage on cloud using hybrid cryptography and data deduplication

📅 2017 - 2018   📍 Nashik

The project was Cloud Based project. We used Cloud as our service provider. The main aim of the project was to provide high end encryption with least errors.

- The Project was successful to encrypt a text file into a secure file which was then stored on the dropbox.

Placement Management System

📅 2019   📍 Pune

The main aim of the project was to decrease the man work present in the placement process.

- The project was capable of decreasing the man work in the placement process.
- We gave features like online document verification and uploads.
