EDUCATION

PSNA College of Engineering and Technology, Dindigul—
BE(CSE)

June 2012 -April 2016

EXPERIENCE

Nissan Digital Hub, Trivandrum — *Software Engineer*

November 2018 - PRESENT

Worked as a Full Stack Developer in various Projects

PROJECTS

- **Error Code Management**

  Worked as an individual Fullstack developer in this application that handles Error codes for all the applications across Nissan.

  (Angular 6,Spring Boot, Docker, AWS ECS,AWS EC2, AWS SQS,Oracle SQL)

- **Customer Ex**

  Worked as Frontend Developer in creating Kiosk application that gives futuristic Customer Experience to users which suggests them to buy a particular Car based on their personas.

  It went live in several international airports across the world.

  (Angular 6,git,Docker)

- **Product Planning 2.0**

  Contributed as Frontend Developer in this application which helps product planners to make decisions on launching new vehicle models across various regions.

  This is a standalone touch application which contains various widgets in which each widget extracts real time data which helps product planners to decide to take necessary actions.

  (Vue.js, vanilla javascript,Electron,Git,Docker)

SKILLS

Java 11
