WORK BACKGROUND

Web Developer

ImagiNET Ventures | March 2018 - present

- Design, build, or maintain web sites, using authoring or scripting languages, content creation tools, management tools, and digital media.
- Created, hosted and maintained WordPress and Magento based sites, created custom themes and plugins.
- Created modular, responsive templates using modern CSS standards and JavaScript libraries.
- Work directly with client stakeholders to develop technical solutions for business cases.
- Created modern web applications with JavaScript Frameworks like Vue.js and integrated backend RESTful APIs.

PROJECTS

LetMeSave

http://13.232.187.41/frontend/
eCommerce web application with multi user role. The frontend is completely done with Vue.js (Nuxt.js).

TNQ

http://imaginetventures.us/
A very specialized web application for a publishing company to automate their internal process of reference styling. Frontend is built with Vue.js. Consumes REST API from laravel backend.

Chi2020

https://chi2020.com/
eCommerce website for a eye wear line based in the US. Built using Magento 2 and the default Luma theme as a base
