PROFESSIONAL SUMMMARY

With close to 2 years of Experience in Software Development. Established back-end web developer, specializing in attention to detail, API design and uniformity. Outstanding comprehension of software engineering, with a focus on establishing a user-friendly atmosphere, solid structure, smooth navigation and unique design. Versatile, experienced technical contributor —an asset to any development team.

EXPERIENCE

SOFTWARE ENGINEER

BRIDGEi2i Analytics | Bengaluru, KA   10/2019 – till date

Since 2011 Bridgei2i brings together extensive Technology Industry expertise, Data Science capabilities and AI – powered accelerators to help Technology companies drive actions for digital transformation outcomes. I worked for 1 of the clients of Bi2i which is Chubb Insurance. In Commercial Insurance, Underwriters are responsible for reviewing an insurance application, and make decisions so as to 'Accept' or 'Reject' an application. They rely on a lot of information to arrive at these decisions.
Project:
1. **CHUBB DEEP LEARNING**
2. **CHUBB AUTO-UNDERWRITTING**

- Build a website from scratch using node and express JS to provide solution for underwriter to automate the claims and insurance process. handled DB and Backend part alone
- Designed the Database Schema using MYSQL workbench
- Developed backend Rest API
- Performed integration testing
- Implemented User-Assignment functionality
- Build Data Loading ETL process using Node
- Implemented swagger, transaction and logs using Winston logger
- Code deployed in 0350 Linux server
- API Integration
- **Tech Stack: JavaScript, Node, Express, Postgres, SQL Server, Sequelize ORM, Bitbucket, Git, JIRA, VSCode, PGAdmin, Postman**

TRAINEE SOFTWARE ENGINEER

Trigent Software ltd | Bengaluru, KA   10/2018 – 10/2019

Trigent enables clients to transform, modernize and standardize IT environment by leveraging emerging technologies and a proven hybrid global delivery model.
Project: Kimco Realty
Kimco Realty Corporation is a real estate investment trust that invests in shopping centers. As of March 31, 2020, the company owned interests in 401 shopping centers, comprising 70 million square feet of leasable space.

- Developed SOAP API using .Net
- Refactored legacy Code to effectively use.
- Developed Automation-Framework to test all API's and also implemented sending email feature.

- Moved SFTP Server to Azure cloud
- POC's on salesforce to get some idea about salesforce lightning vs classic
- Tested all backend API's using postman
- **Tech Stack: C#, ASP.Net, Azure, SQL Server, Salesforce, postman**
