Bhatimanishkumar7@gmail.com

I am an Android Developer with 3+ years of experience. Focused on developing a robust application with user-friendly UI. I apply new concepts in my DAILY development process and keeping myself updated by learning new technologies. I am looking for a company that brings new challenges in my development process and helps me and the company to grow on a larger scale.
Apart from that I also like python as a developing language. To test my python skills I compete in Kaggle competitions.

Work

Software Developer
Motilal Oswal Financial Securities Ltd.
Jan 2018 – Present

Developing & maintaining application by applying new technologies (kotlin, RxJava, Dagger, Retrofit etc.). Resolving and finding causes of live app issue in a minimal time period.

Projects

1 **Online Trading App for Shares, Forex: MO Trader**

- This application was used for stock trading on daily basis.
- It was developed using Kotlin language.
- Major libraries used are Retrofit, Okhttp, Dagger, RxJava , Firebase, Picaso , Groupie etc.
- It contains Widget, app shortcut, sticky notification for easy access.
- Used MVP for architecture pattern.

2 **Mutual Funds & Share Market App: MO Investor**

- This application was used for stock trading and MF on daily basis.
- It was developed using Kotlin language.
- Major libraries used are Retrofit, Okhttp, Dagger, RxJava , Firebase, Picaso, Groupie etc.
- It contains Widget, app shortcut for easy access.
- Used MVP for architecture pattern.

3 **MyZone**

- This application was used by Motilal Oswal employee for daily attendance login, attendance regularizing etc.
- It was developed using Kotlin language.
- Major libraries used are Retrofit, Okhttp, Dagger, RxJava , Firebase, Picaso, Groupie etc.
- Used MVP for architecture pattern.

4 **Motilal Oswal AMC – MF & PMS**

- This application was used for PMS and MF related trading.
- It was developed using Kotlin and JAVA language.
- Major libraries used are Retrofit, Okhttp, Dagger, RxJava , Firebase, Picaso, MPChart , Groupie etc.
- Used MVP for architecture pattern.

5 MO PWM.

- This application was used by employees for internal purpose for client report generation.
- It was developed using Kotlin and JAVA language.
- Major libraries used are Retrofit, Okhttp, Dagger, RxJava , Firebase, Picaso, MPChart , Groupie etc.
- Used MVP for architecture pattern.
