OBJECTIVE

Seeking an entry level position in a reputed organization, allowing me to utilize my skills, education, knowledge and experience by enhancing the organization's reputation and growth while gaining valuable work experience in a team-oriented environment.

EXPERIENCE

Software Product Developer,
Comviva Technologies

As a software development engineer, I am working with Comviva's iPacs SND (Sales and Distribution) team to deliver web application for Inventory Management System using technologies like Spring MVC, JavaScript, JDBC.
- Working on developing an application that can manage an operator's inventory levels, orders, sales, returns and deliveries.
- Working on backend process for third party interfaces using Rest Web services, JDBC and Oracle/MySQL.
- Provided Onsite support for more than two projects.
- Working on databases like Oracle and MySQL.

📅 **July 2018 – Present**

INDUSTRIAL TRAINEE,
Keysight Technologies

As a QA R&D intern, I have been assigned the role of automating the Keysight's drivers by the use of tools like Visual Studio and the C# language. Testing of Hardware Instruments used in measurement of signals.
- Worked on developing Automation test suite using C sharp, Keysight Fusion tool and Testify tool.
- Worked on wide varieties of Spectrum Analysers and Oscilloscopes
- Worked on JIRA for defects/bugs fixing.
- Worked on Spectrum Analyser Base IVI Driver and Vector Modulation Analyser IVI Driver

📅 **January 2018 – June 2018**

CORE COMPETENCIES
